

Panasonic Avionics Corporation is the world's leading supplier of in-flight entertainment and communication systems. The company pioneered the industry beginning in 1979 and has consistently introduced innovations that enable unique customer experiences and enhance airline loyalty (NPS), ancillary revenue, and operational efficiency.

Leading airlines across the world have chosen to install Panasonic Avionics IFE systems on more than 15,000 commercial aircraft and satellite Wi-Fi connectivity on over 3,400 aircraft. Panasonic Avionics' proven systems power approximately 70% of the global IFE-equipped fleet and is supported by the largest, global support and services team utilizing OEM insights to ensure peak system performance.

Panasonic Avionics Corporation is headquartered in California with over 3,500 employees and operates in 50 locations around the globe.
