

Florentina started her career as an Engineer in Propulsion Systems with TAROM Airlines. She continued to take on increasing responsibilities in positions at Rolls-Royce and Bombardier, expanding her career into Aircraft Configuration, Project Management, Avionics, Electrical and Cabin systems. Florentina was an instrumental figure in the development of what is today the A220 aircraft, from its advanced design stages through to Entry into Service. Florentina is currently Head of the Airbus TwoTwenty Corporate Jet Development Programme, another family member of

our fantastic A220 Product Portfolio.

“From my participation in ICAO committees on reducing carbon emissions, to the development of one of the world’s greenest commercial aircraft, the importance of sustainable aviation has been intertwined in my career”, notes Florentina. “Working at Airbus, a company committed to sustainability, further reinforces that experience. I am pleased to be able to participate in [this forum]. “
